1. Supplier quotations at a glance

Record each quotation on the same basis before comparing prices. A quotation that excludes delivery, tax, or another cost must not be compared as if it included it; record the exclusion and adjust the comparable total accordingly.

2. Line-by-line comparison

Compare line by line so a low total built on a missing line is not mistaken for a better price. The comparable total for each supplier is the sum of every line plus delivery and other charges, on the same tax basis for all suppliers.

Line item	Quantity required	Unit of measure	Supplier one unit price	Supplier one line total	Supplier two unit price	Supplier two line total	Supplier three unit price	Supplier three line total

3. Evaluation and recommendation

Score each supplier from 1 to 5 on each criterion below, using the same scale as the scorecard: 5 exceeds the requirement, 3 meets it, 1 does not meet it. Do not award on price alone where delivery, quality, or support would put the requirement at risk.
